- Over 200 Members nationwide
- Electronic Alarm / Immobilisers
- Mechanical Gearlocks
- Vehicle Tracking & Recovery
- Vehicle Identification
- And many more vehicle related approval categories

**Re:** Reference letter - ITA Services Group

**Situated at:** Millenium Park, Block A, Unit 55 & 56, Edison Way, Century City, South Africa

This letter serves to confirm that the ITA Services Group has offered vehicle tracking and monitoring services for over 20 years.

VESA conducts VCCT Audits at our VESA Telematics Members premises on a bi-annual basis. During these audits vehicle recovery capabilities are carried out (undisclosed Mock Recoveries).

Monthly Recovery Rates are compiled by VESA whereby individual incident reports from ITA Services group gets audited.

Various vehicle recovery companies and personnel across South Africa are used by the ITA Services Group to compliment its footprint in the market. The footprint consists of recovery response teams and aircrafts.

Outsourced recovery companies are currently not audited by VESA. I have no objection to recommend their services to prospective companies that require this service.

Best regards
